Subject: Freedom - Public Water System: Freedom Village Condominiums (EPA #0862030)

Dear Mr. Oliver:

The records of the NH Department of Environmental Services (DES) show that Freedom Village Condominiums water system is classified as a public water system (PWS), as defined by RSA 485:1-a. A PWS is defined as any water system supplying 15 or more services, or 25 or more people for 60 or more days per year. As such, the water system owner is required to submit samples according to the system's established Master Sampling Schedule to the State laboratory or a State-certified laboratory in compliance with NH Administrative Rule Env-Ws 321 through 330.

The federal Environmental Protection Agency promulgated new radionuclide rules governing the acceptable levels of radionuclides in the Nation's community public water systems. Consequently, DES recently adopted new rules in conformance with the federal requirements. New maximum contaminant levels (MCLs) were established and additional requirements instituted for the currently regulated radionuclides. Note that the new Uranium standard became effective in January, 2004. Compliance will be determined upon completion of four quarterly samples, unless any one sample result would cause the running annual average to exceed the MCL. As a result of the new regulatory requirements, prompting a review of historical water quality data by senior DES staff, we determined that the following have been in violation.

SITE: #000 - Dep Sampling Tap/Pump House/Blend 003 and 004

Contaminant	MCL (units)	Historical range	Latest result (date)	Violation (yes/no)
Compliance gross alpha	15 pCi/L	Below detection – 26 pCi/L	25.3 pCi/L (3/22/04)	Yes
Uranium	30 ug/L	382.3 – 425 ug/L	400 ug/L (3/22/04)	Yes
Radium 226 & Radium 228	5 pCi/L	None available	1 pCi/L (3/22/04)	No

DES believes the MCL violation(s) can be corrected and future violations prevented by taking the following actions:

1. **By June 3, 2004**, provide public notice of the exceedence(s) following the guidelines on the enclosed public notice handout. Continue providing public notice **each calendar quarter** for as long as the exceedence occurs; and
2. Upon request, you shall make alternate (*i.e.* bottled) water available for human consumption. If bottled water is used, the source must be an approved source, monitored in accordance with Env-Ws 389;
3. **By May 27, 2004**, provide proof of public notice to this office following the guidelines on the enclosed public notice handout.
4. **By June 3, 2004**, retain the services of a qualified consultant to address the water quality violation(s) and notify DES, in writing, of the name of the consultant hired. The consultant should review all existing water quality data prior to making recommendations for correcting the MCL violation(s); and
5. **By July 19, 2004**, submit to DES the consultant's report, which shall contain the consultant's recommendations, and cost estimates, along with an implementation schedule to correct the MCL violation(s). A maintenance schedule must be included if treatment is proposed. DES must approve the consultant's report/recommendations, the maintenance schedule, and the proposed implementation schedule prior to any work being done on the system; and
6. By the DES-approved correction date, take the corrective action as approved by DES. Notify DES in writing upon completion of the action(s) taken; and
7. Continue to sample in accordance with your Master Sampling Schedule, which includes **quarterly sampling** for compliance gross alpha and Uranium through 2007.

In the event compliance is not achieved within this period, DES may take further enforcement action. These actions include issuing an order requiring the deficiencies to be corrected, initiating an administrative fine proceeding, and/or referring the matter to the NH Department of Justice for imposition of appropriate penalties.

The information as requested above should be addressed as follows or faxed to (603) 271-5171:

Anne Bailey  
Department of Environmental Services  
Water Supply Engineering Bureau  
29 Hazen Drive, PO Box 95  
Concord, NH 03302-0095

It is important to also note that while a Radon standard has not yet been finalized, your levels have ranged from 420 – 5500 pCi/L. The most recent Federal standard proposed was 4,000 pCi/L if a Multimedia Mitigation Program (MMM) was in effect for that community. Without such an MMM program the maximum acceptable Radon level in drinking water could not exceed 300 pCi/L.

For your information, a fact sheet on Mineral Radioactivity is available on our web site at: <http://www.des.state.nh.us/ws.htm>. This includes general information, health effects and removal options. Please be reminded that proposed treatment alternatives should take into consideration all water quality parameters as well as current and future quantity needs. Bernie Lucey, P.E., may be able to answer questions concerning treatment for the aforementioned contaminant(s). He may be reached at (603) 271-2952 or via email at [blucey@des.state.nh.us](mailto:blucey@des.state.nh.us). If you have any questions regarding this letter, please contact Selina J. Makofsky, P.G., at (603) 271-4109 or by email at [smakofsky@des.state.nh.us](mailto:smakofsky@des.state.nh.us).

Sincerely,

**COPY**
